(Lavender and marigold grown as companion plants)

Front by garage door

Lemon

Lavender under magnolias

Under Window of TV Room

Lemongrass

Tomato

Capsicum

Chilli

Ginger by air conditioning unit

(Lavender and marigold grown as companion plants)

Back Yard

Turmeric under side back patio

Ginger by paver steps

Lime by tank

There is a worm farm under the bathroom window.

The two taps by the tank water hose (by paver stairs) feed drip water tubes under the left and right/rear hedges (facing the back fence) for easy watering directly into the roots and under the cover of mulch for maximum water conservation.

The gardens enable plants which prefer full partial and limited sunlight and within easy access to a hose.
